

Digital Forensics and Incident Response

Quickly getting you back to normal operations is just the beginning.

ASSURATM

Cybersecurity uncompromised.

Delivering detailed documentation of the attack, how it happened, and ensuring it doesn't happen again.

Assura's Digital Forensics and Incident Response (DFIR) team is methodical in our approach to these cyber emergencies. First and foremost, our priority is to stop the bleeding, find out what happened, and restore systems to normal operations as soon as possible. We treat the digital environment just like a crime scene, because that's exactly what it is. And like all crimes, the

perpetrators leave a trail of evidence behind that needs to be thoroughly analyzed to truly understand the scope and depth of the attack. This thoroughness ensures that the bad guys are cleared out of the environment for good and that the attack path they used is secured.

Why insurance companies and Panel Counsel Firms should add Assura to their digital forensics team:

- We sweat every detail and provide the highest level of documentation
- We're fast, but not to the point where there's a risk of anything overlooked
- We're discreet and understand the sensitivities associated with these attacks
- Our recommendations put the organization's on the path to strengthening its security posture

Assura delivers two distinct solutions for DFIR.

THE REACTIVE SOLUTION

- Response
- Investigation
- Containment
- Remediation

THE PROACTIVE SOLUTION

- Incident response planning
- Incident response training
- Incident response exercise
- Threat hunting/compromise assessment

Assura's Popular Services:

Fractional CISO, Risk Assessment, Penetration Testing, Security Monitoring and Response, Audit Defense, Extended Detection and Response, Cyber Emergency, Security Awareness and Training, Multifactor Authentication, Continuity Planning, GRC, Disaster Recovery

Assura provides innovative cybersecurity advisory and managed services to clients in the government, healthcare, banking, manufacturing, and transportation sectors. Our unique capabilities include tying together risk-based cybersecurity with sustainable compliance and developing inventive technical solutions for our clients. © Assura Inc. All rights reserved.
